

Sinar FarmPro Moisture Analyser

- Easy to use
- Robust and portable
- Grinds and compresses in one action
- Clear digital readout
- Averaging facility
- Calibrated for 15 crops
- Automatic temperature compensation
- Complete with carry case and brush
- Results in seconds

Product Description

The highly portable FarmPro moisture analyser is the perfect tool for analysing the moisture content of grain, oilseeds and pulses anywhere on the farm. Its rugged construction means that it is durable enough to go anywhere you can. The FarmPro takes a very small sample, 9 or 11ml which makes it ideal for 'rubbing out' prior to harvest.

The FarmPro simultaneously cracks and crushes the sample for quick and accurate results. Simply pour the grain into the measurement cell, screw down the serrated plate and read off the moisture content. The FarmPro measures the conductance of the sample and automatically corrects for temperature. This simplicity does away with the need to mount your machine on a bench or weigh out precise quantities of samples.

With the FarmPro accurate measurements can be taken in the middle of a field with the minimum of fuss.

Product Features

Moisture range:	5% to 45% dependant on application
Operating temperature Range:	0 to 45°C
Readout resolution:	0.1% moisture content
Principal of operation:	Conductance
Temperature comp:	Automatic
Size:	21 x 7.5 x 7.5 cm
Weight inc. carry case:	1.5 kg
Battery:	9v Alkaline
Accuracy:	Better than $\pm 0.5\%$ mc dependant on application
